Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Aluminum, Copper and Other Non-ferrous Metals Foundries apply to both existing and new facilities conducting melting operations located at an aluminum, copper, or other non-ferrous foundry that is an area source of hazardous air pollutants (HAP) emissions, melts 600 tons per year (tpy) of aluminum, copper, or other non-ferrous metal or greater, and uses material that contains or has the potential to emit HAP for which the source category was listed. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is

inoperative. These notifications, reports, and records are essential in determining compliance,

and are required of all affected facilities subject to NESHAP. This information is being collected

to assure compliance with 40 CFR Part 63, Subpart ZZZZZZ.

Form Numbers: None.

Respondents/affected entities: Aluminum, copper, and other non-ferrous foundries.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart ZZZZZZ).

Estimated number of respondents: 318 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 11,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,360,000 (per year), which includes \$0 for annualized capital/startup

and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the

previous ICR. This is due to two considerations: 1) the regulations have not changed over the

past three years and are not anticipated to change over the next three years; and 2) the growth

rate for the industry is very low, negative or non-existent, so there is no significant change in the

overall burden.
